

# Southern Gulf of Mexico Biodiversity gap-analysis

Nuno Simoes

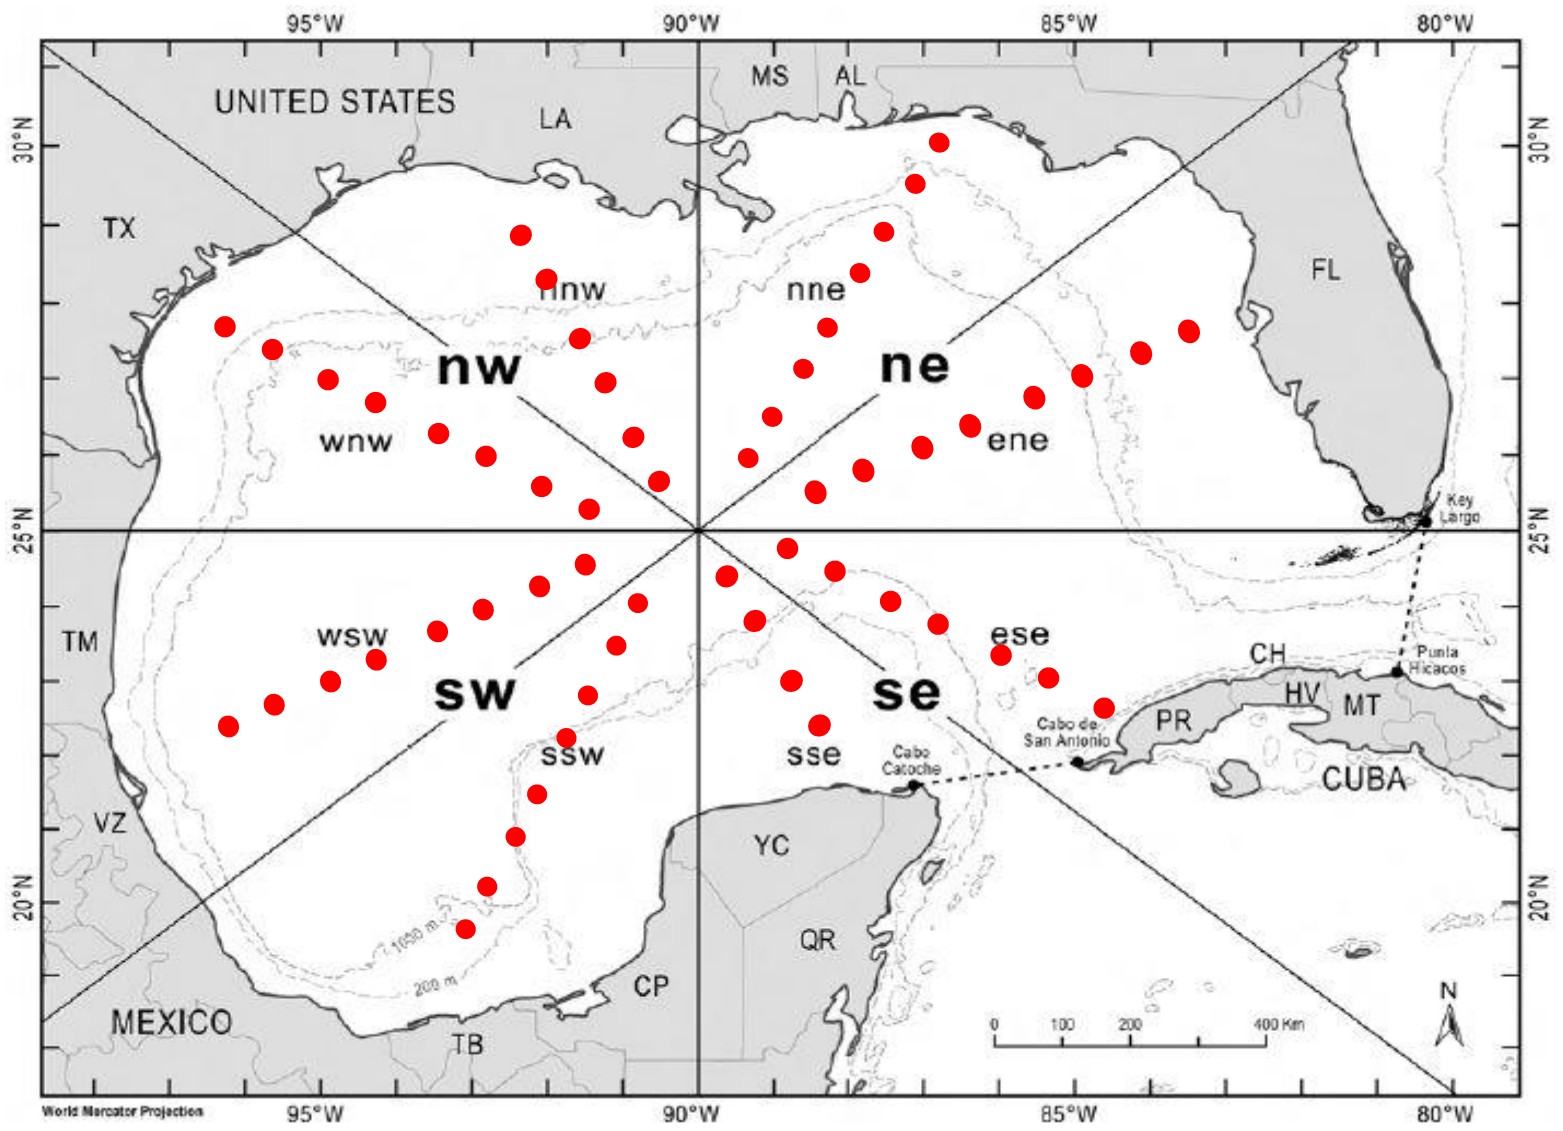

UMDI-Sisal, Fac. Ciencias, UNAM

Mexico

2009 - 7834 species of invertebrates

| Group / taxa       |   | Spp N | endm | %    |
|--------------------|---|-------|------|------|
| vertebrates (fish) |   | 1541  |      |      |
| cnidarians         |    | 792   | 62   | 7.8  |
| sponges            |    | 339   | 109  | 32.2 |
| crustaceans        |    | 2579  | 388  | 15.0 |
| molluscs           |    | 2455  | 257  | 10.5 |
| annelids           |    | 866   | 120  | 13.9 |
| equinoderms        |   | 522   | 31   | 5.9  |
| platelminths       |  | 705   | 191  | 27.1 |
| briozoans          |  | 266   | 55   | 20.7 |
| Tunicates          |  | 78    | 5    | 6.4  |

# Sampling data sources

Cinvestav

# Species data sources

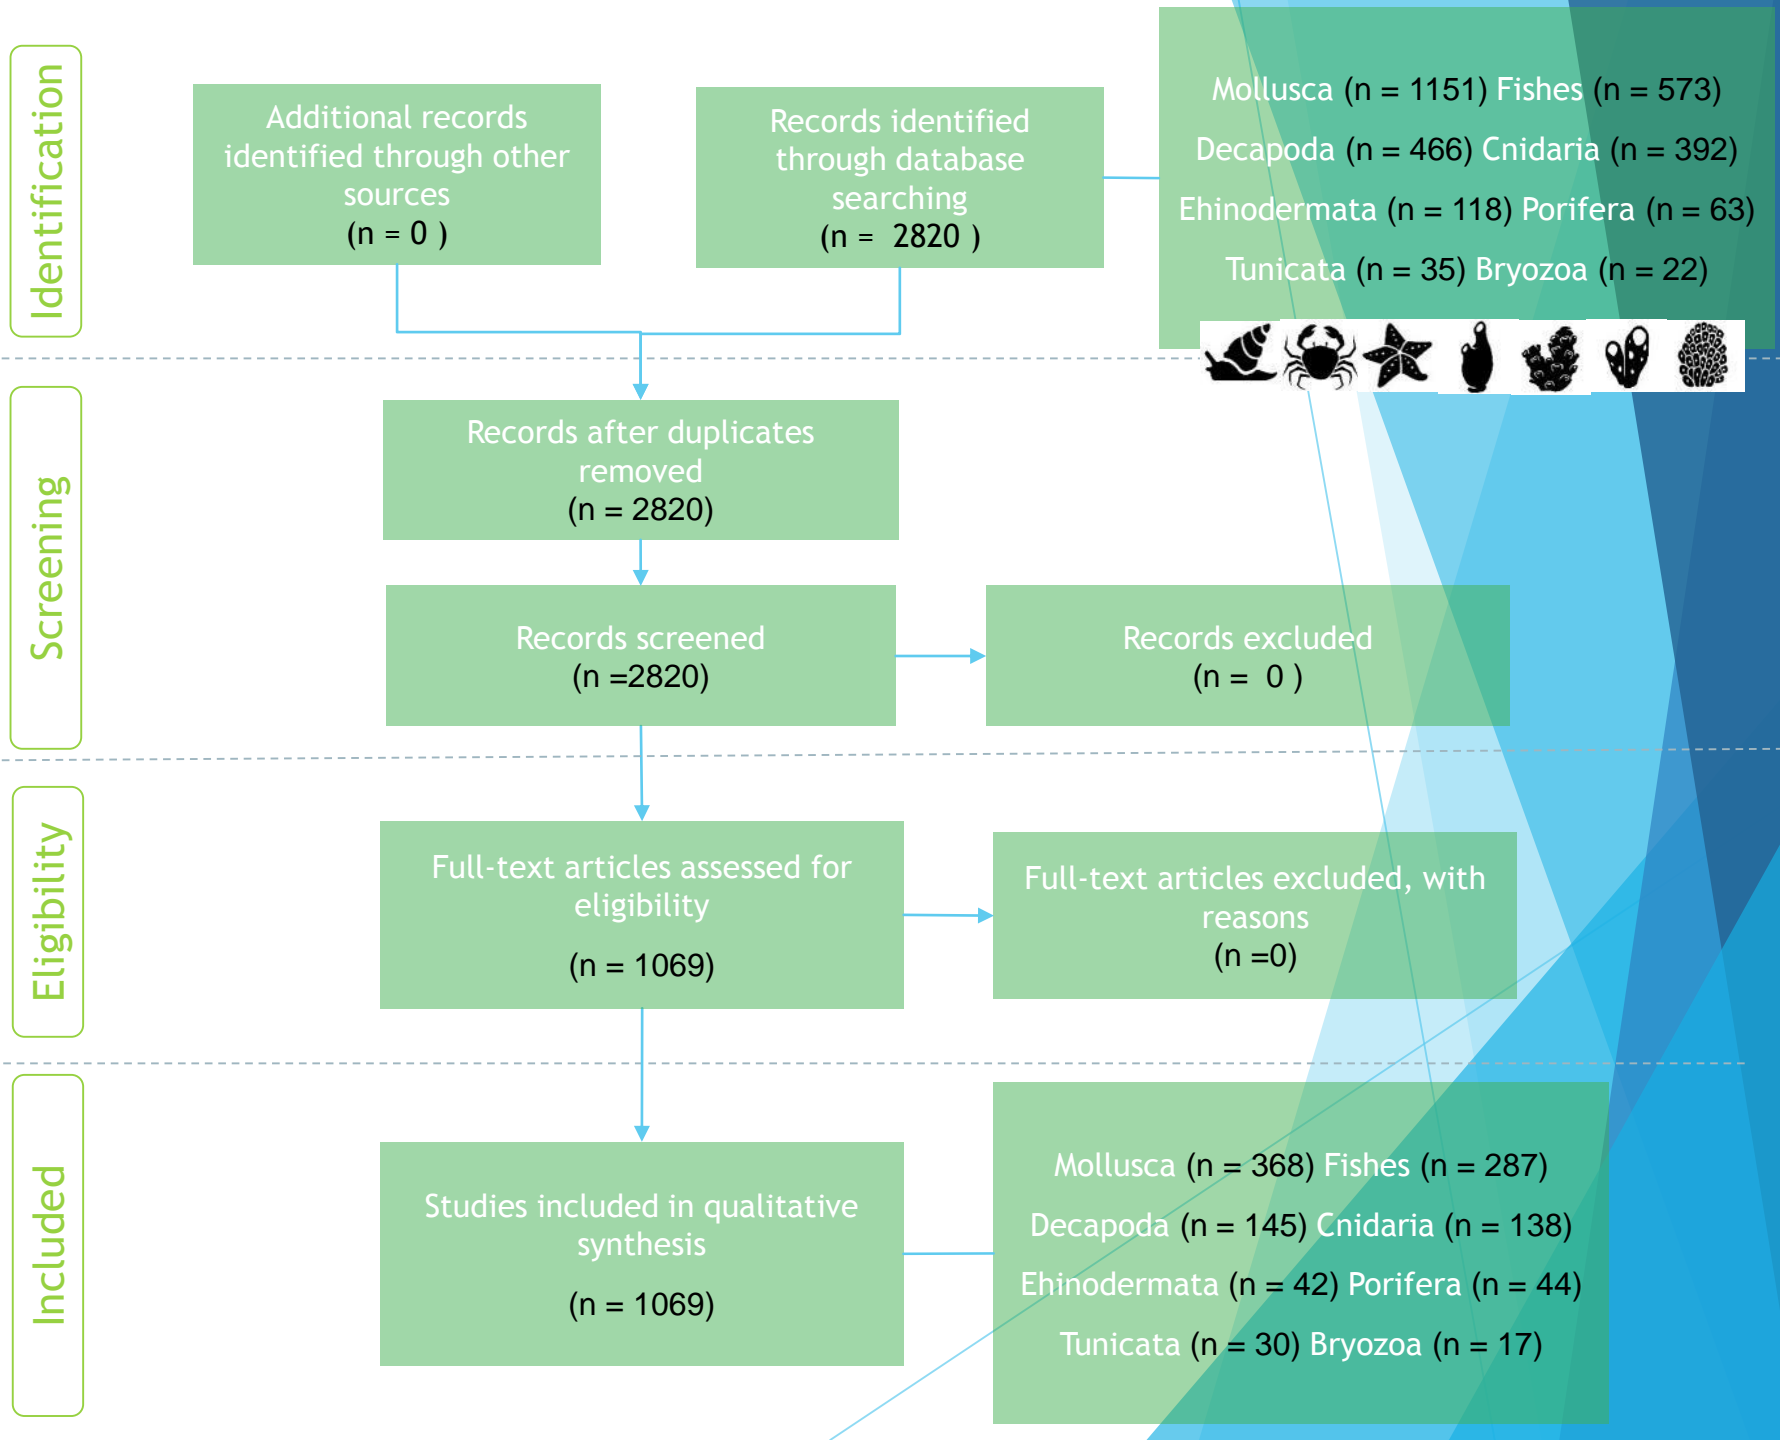

# BioDiv GAP-GMx

## The PRISMA Statement (modified)

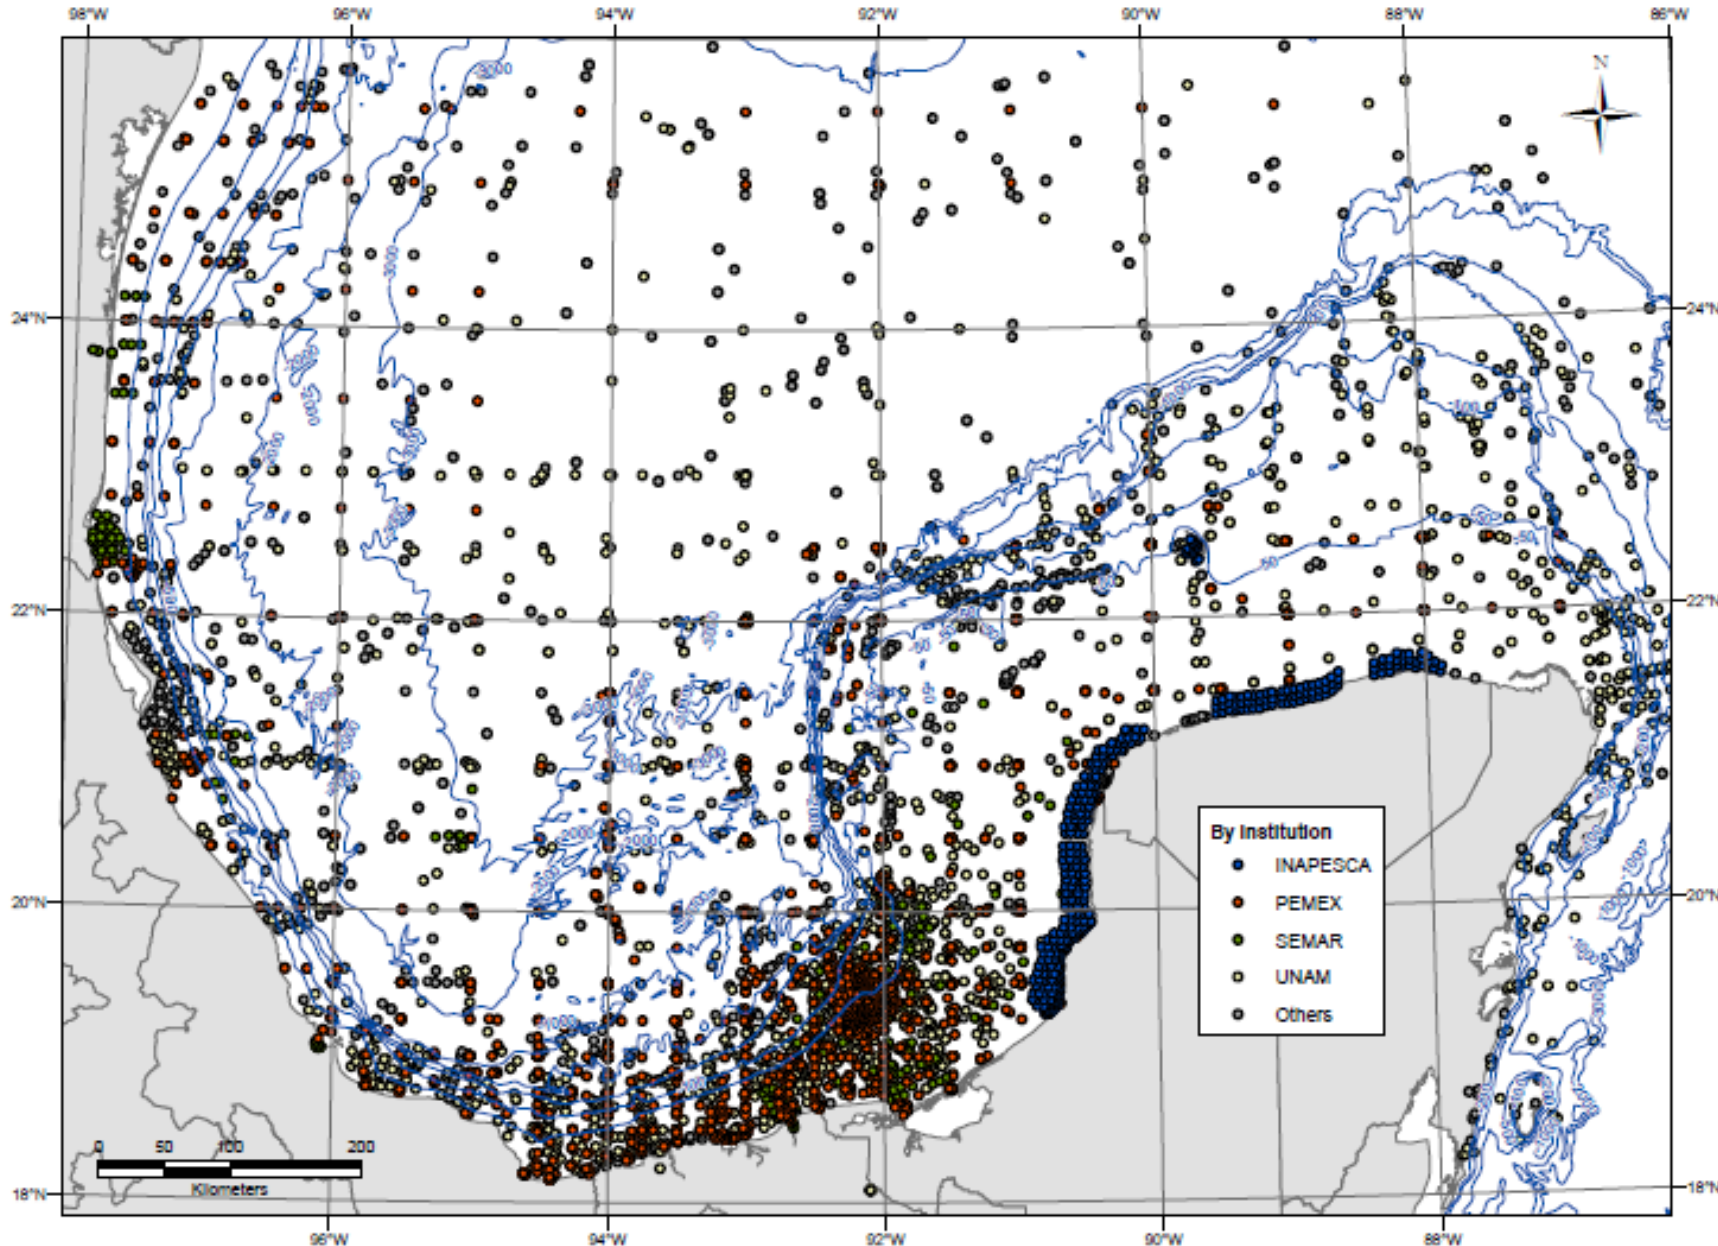

2009

# Benthic Sampling stations (historic, by institution)

Registered sampling points

UNAM (excl. PEMEX) 1829

SEMAR 202

PEMEX 2560

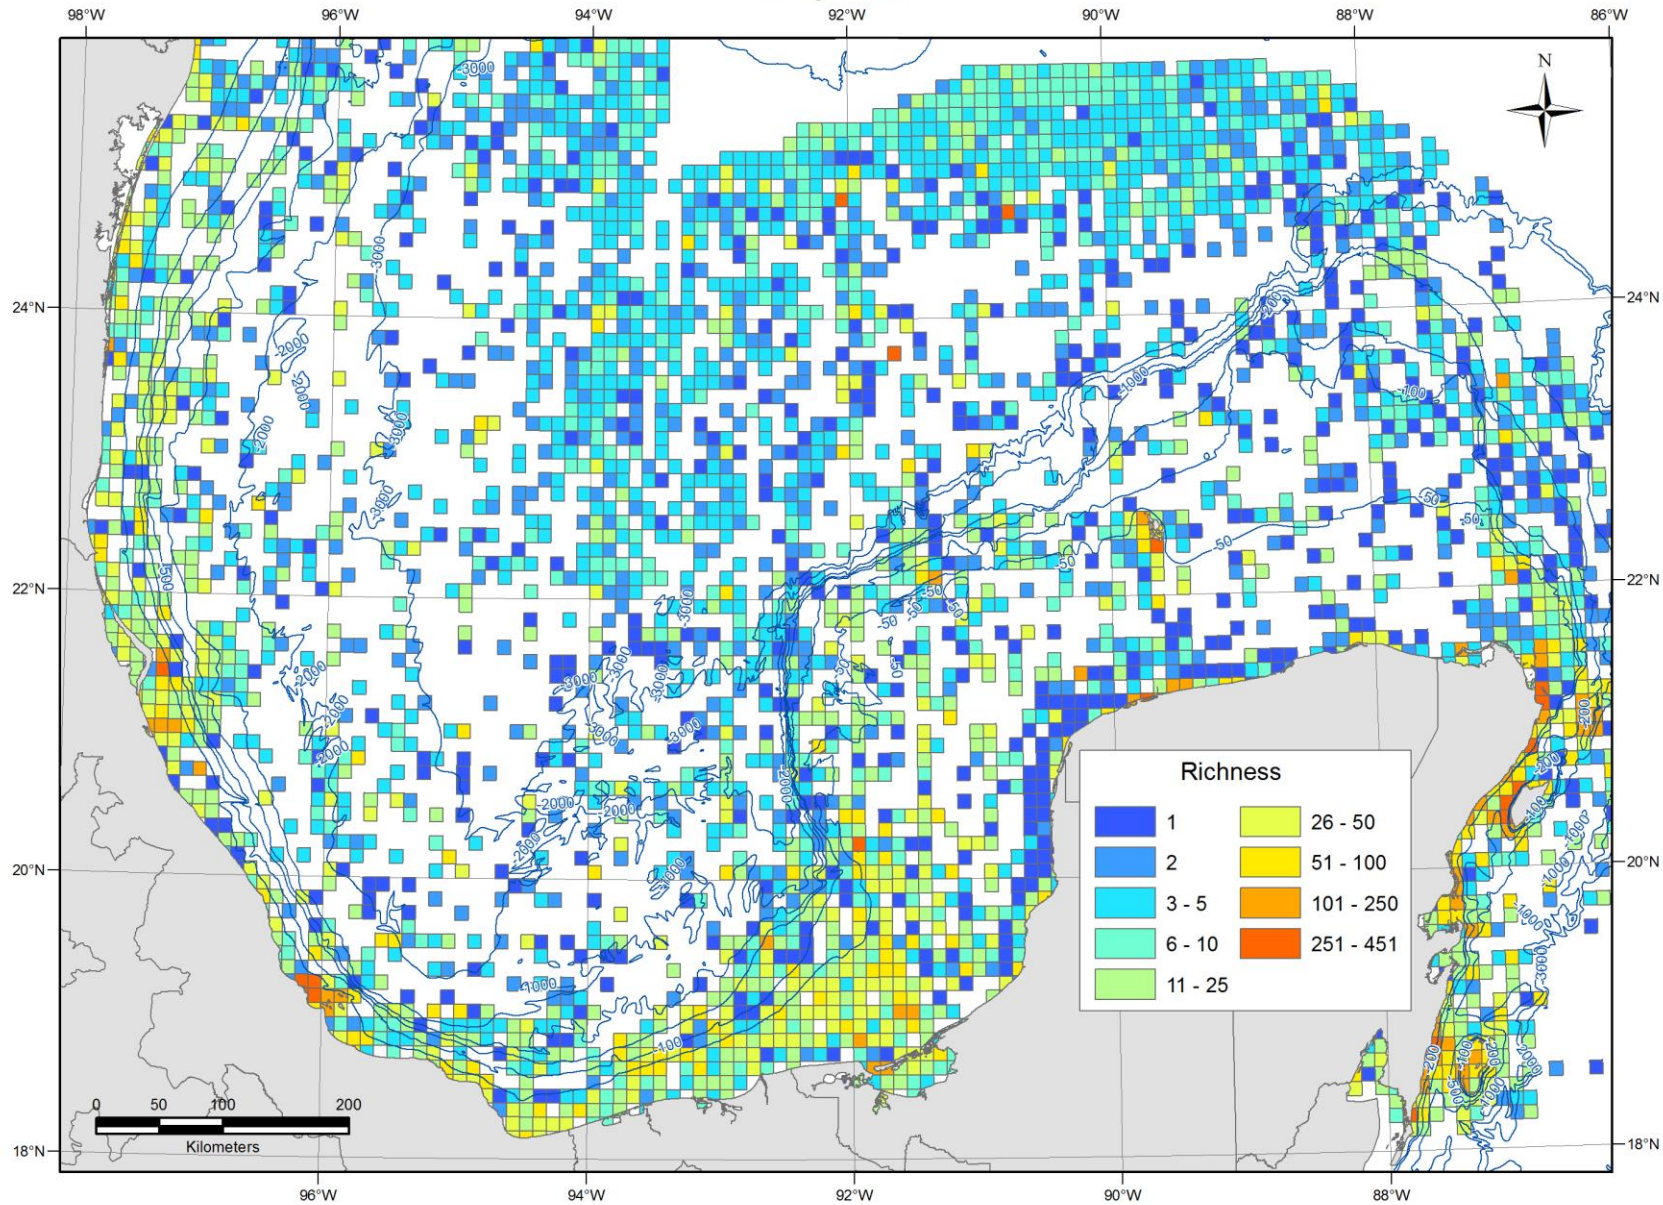

INAPESCA 728

CINVESTAV (incl. PEMEX y otros)

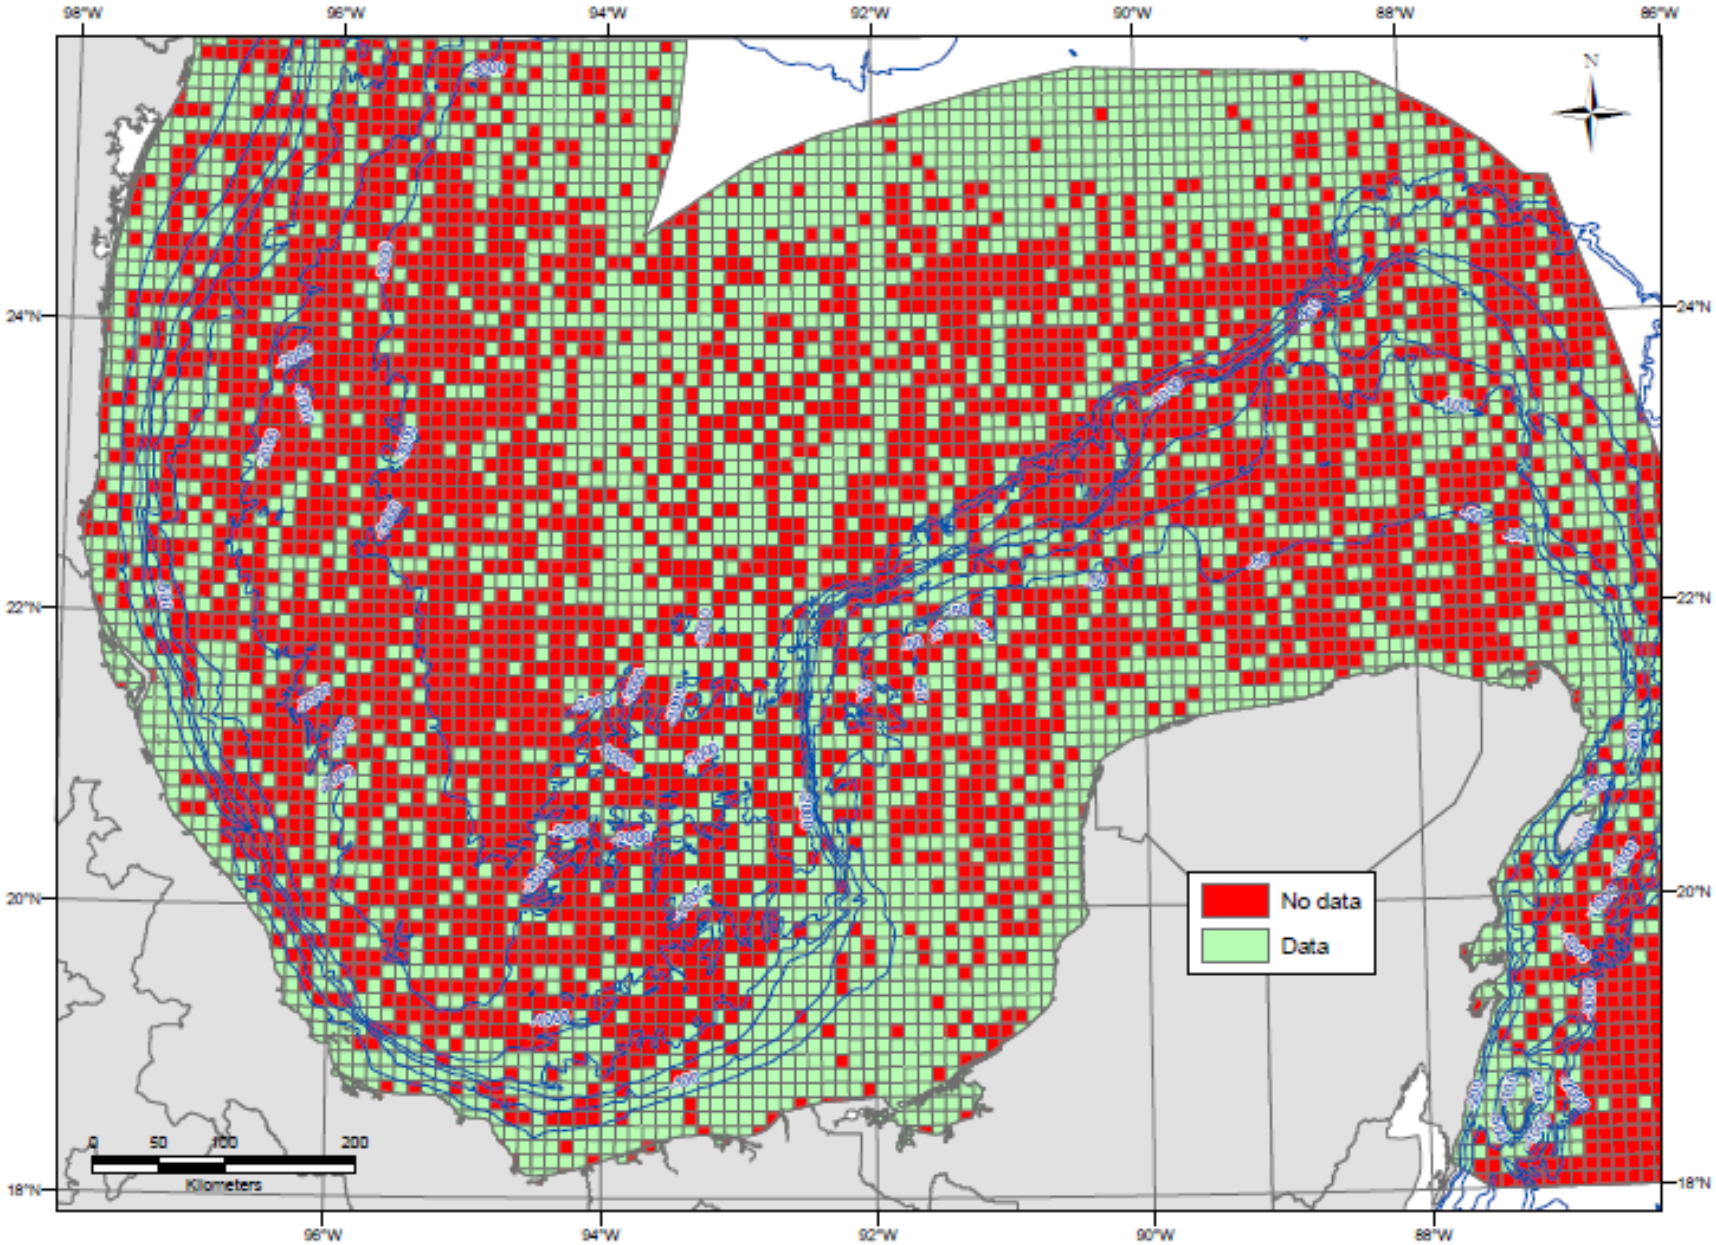

OTROS 2758

Total: 8077 points

# Relative species richness

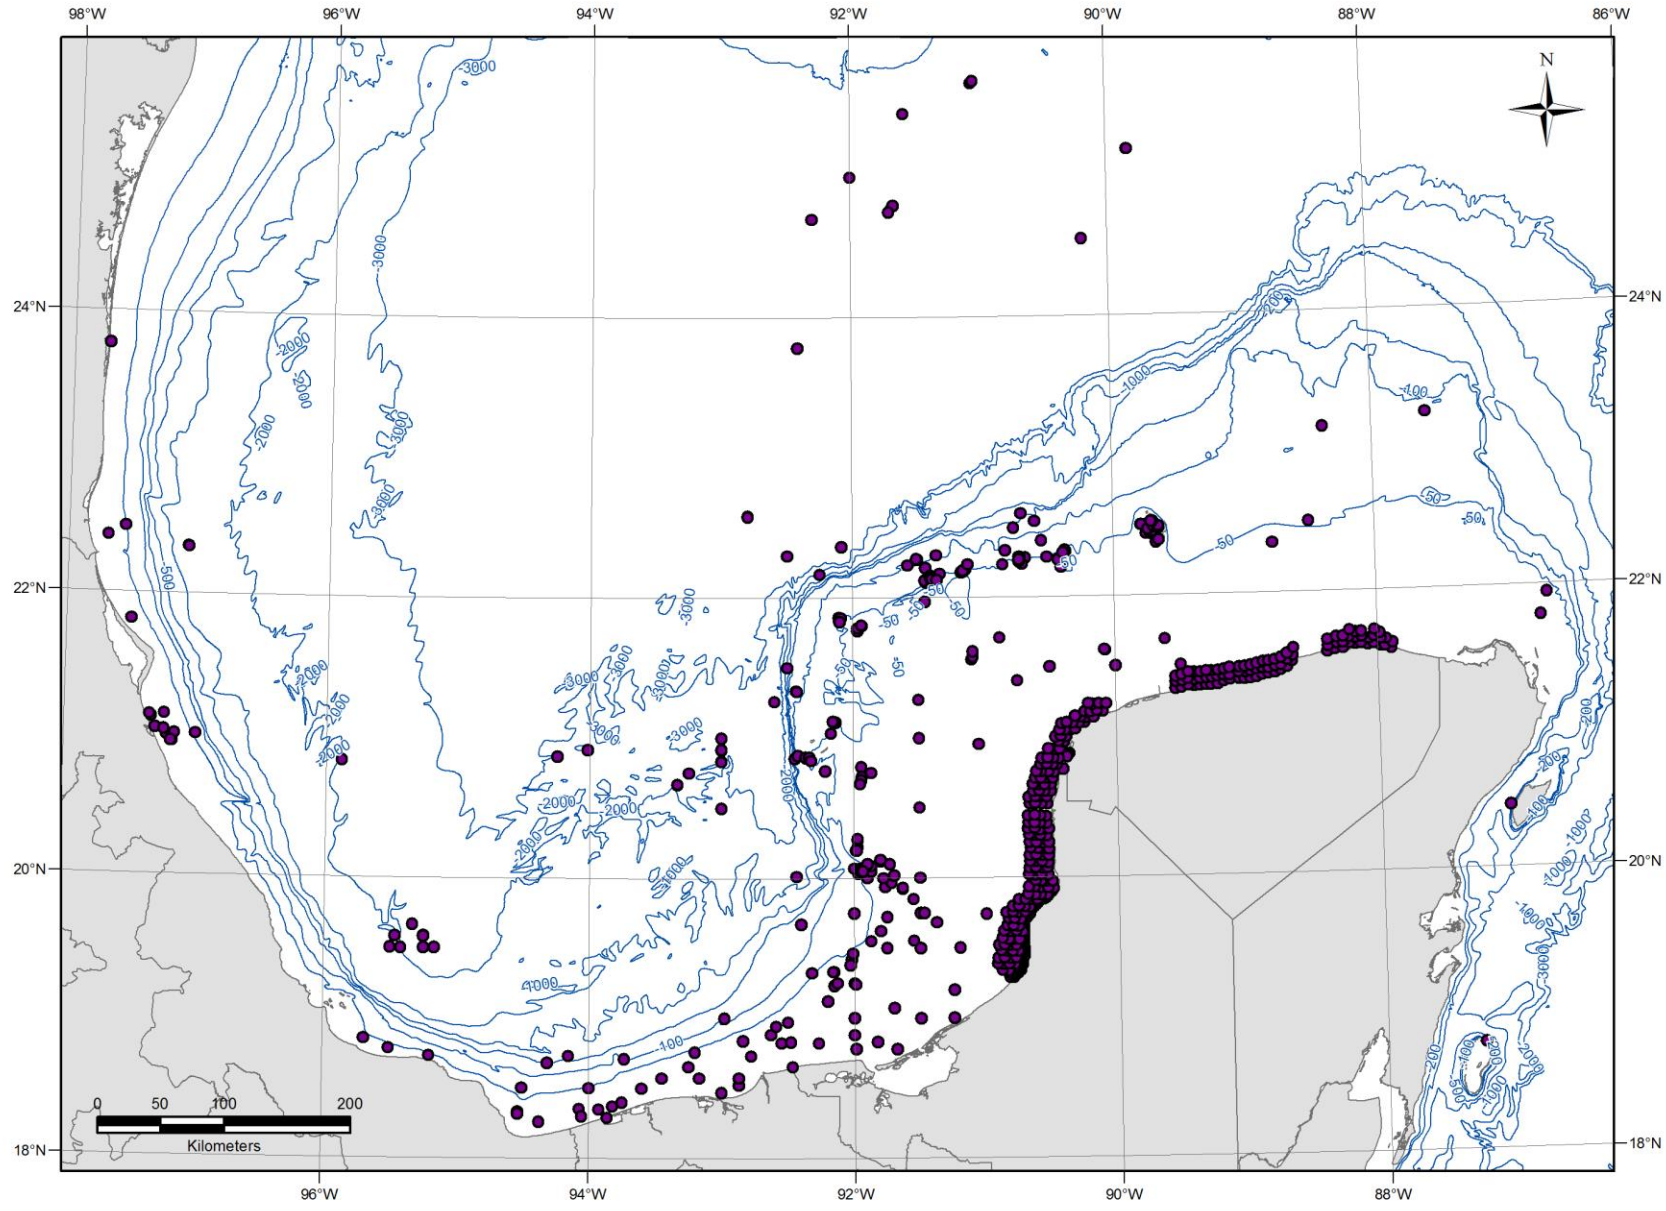

# Sampling Gaps

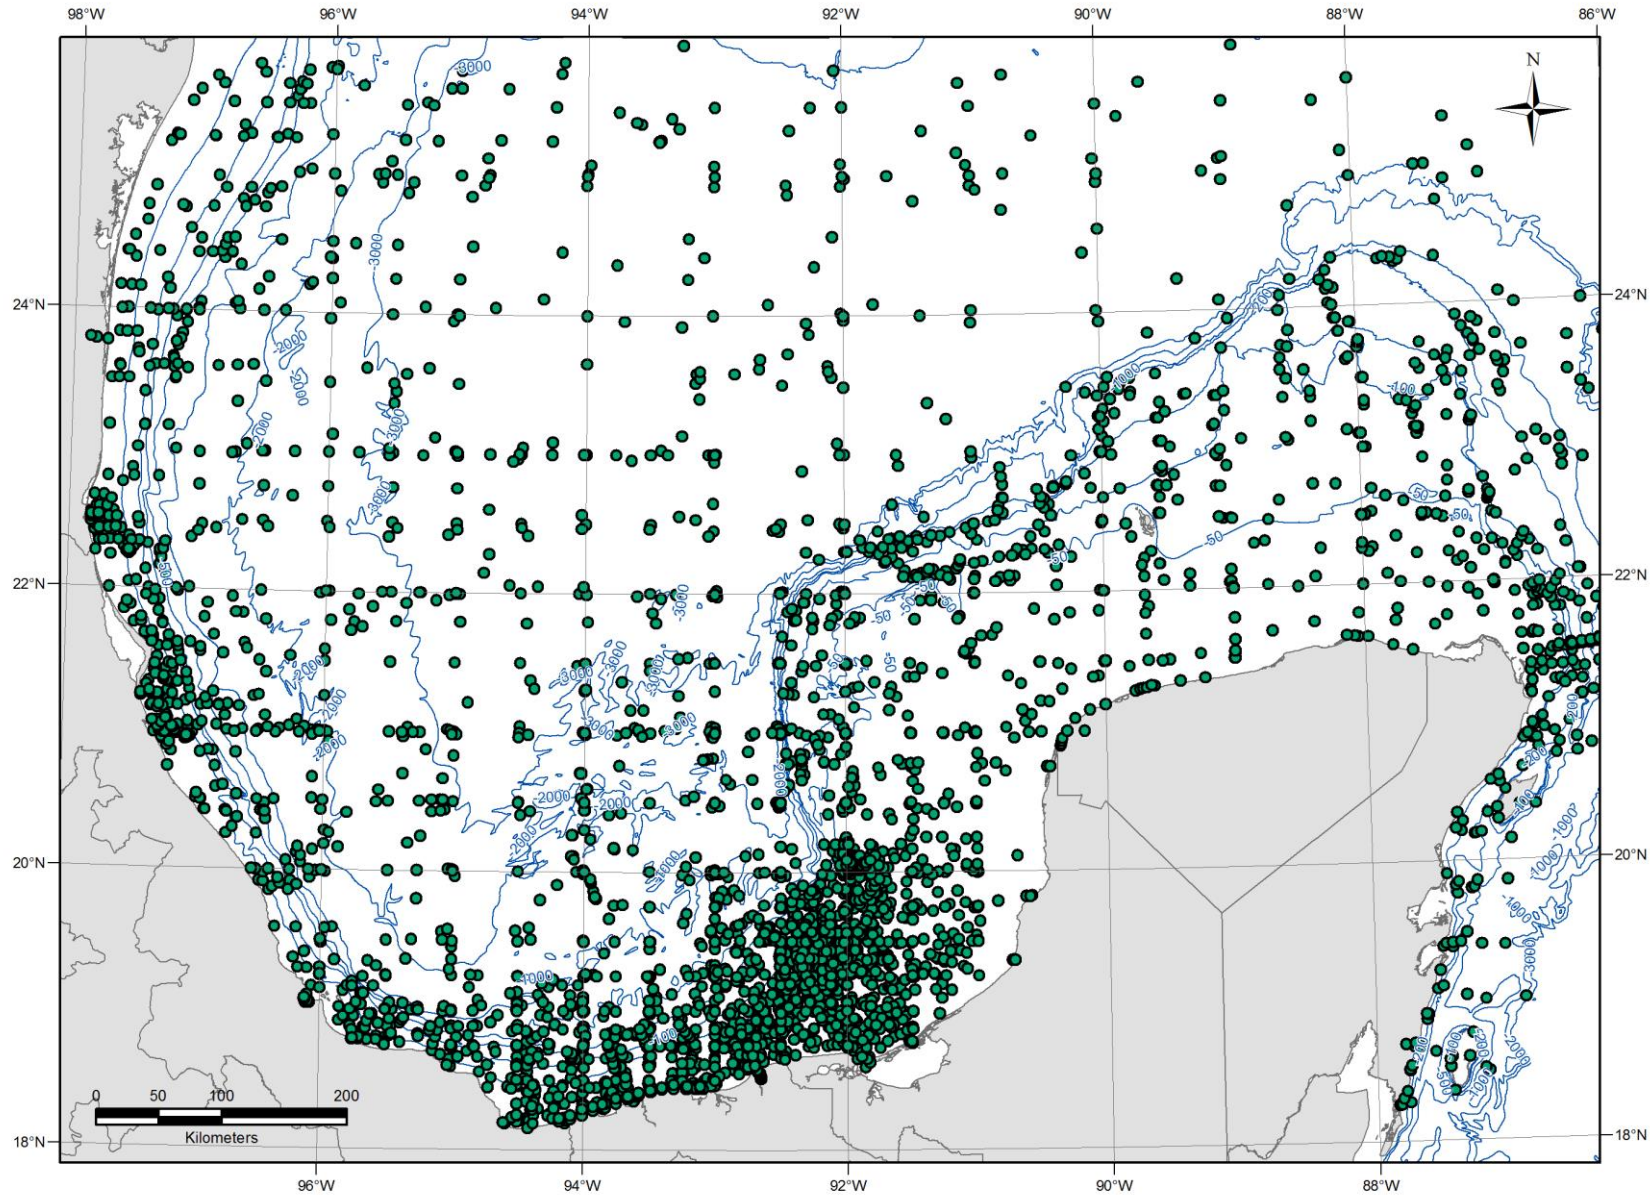

53% gaps

gaps: 4015 en la ZEE mexicana  
7572 pixeles en total

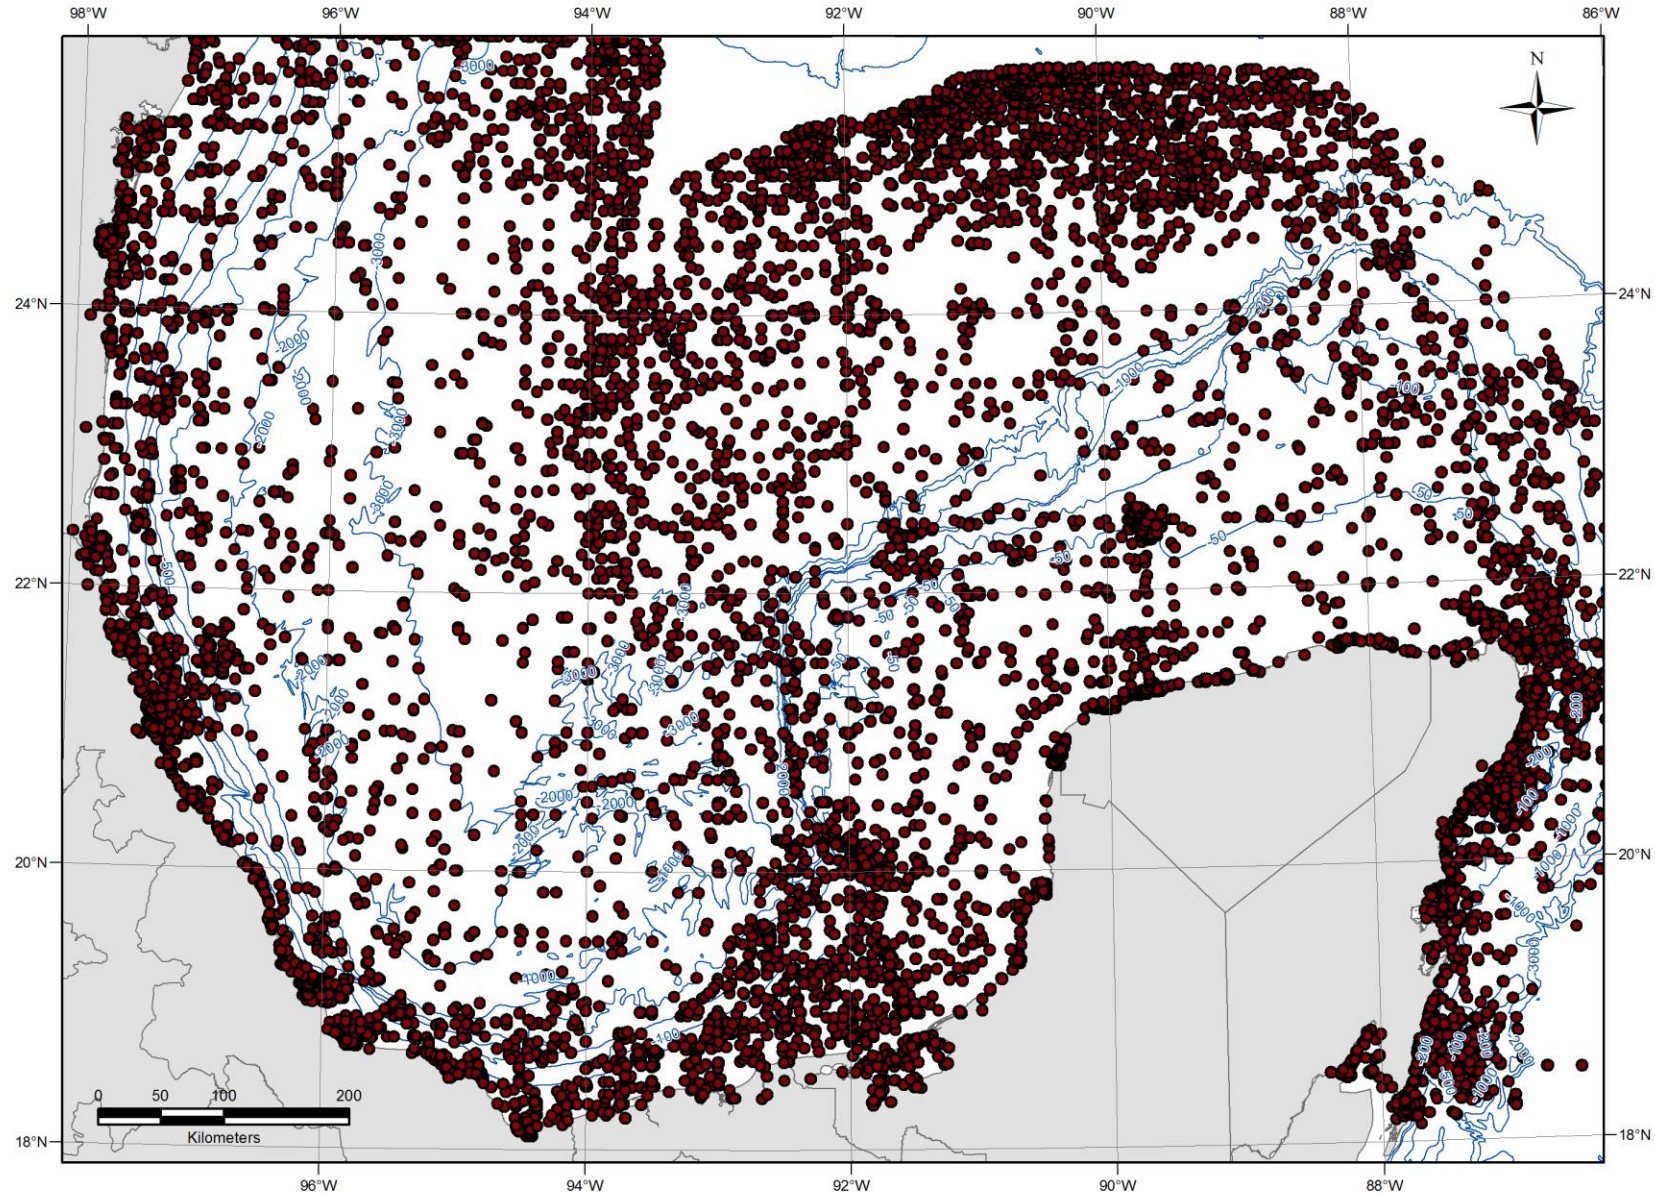

# Species records with related sampling information

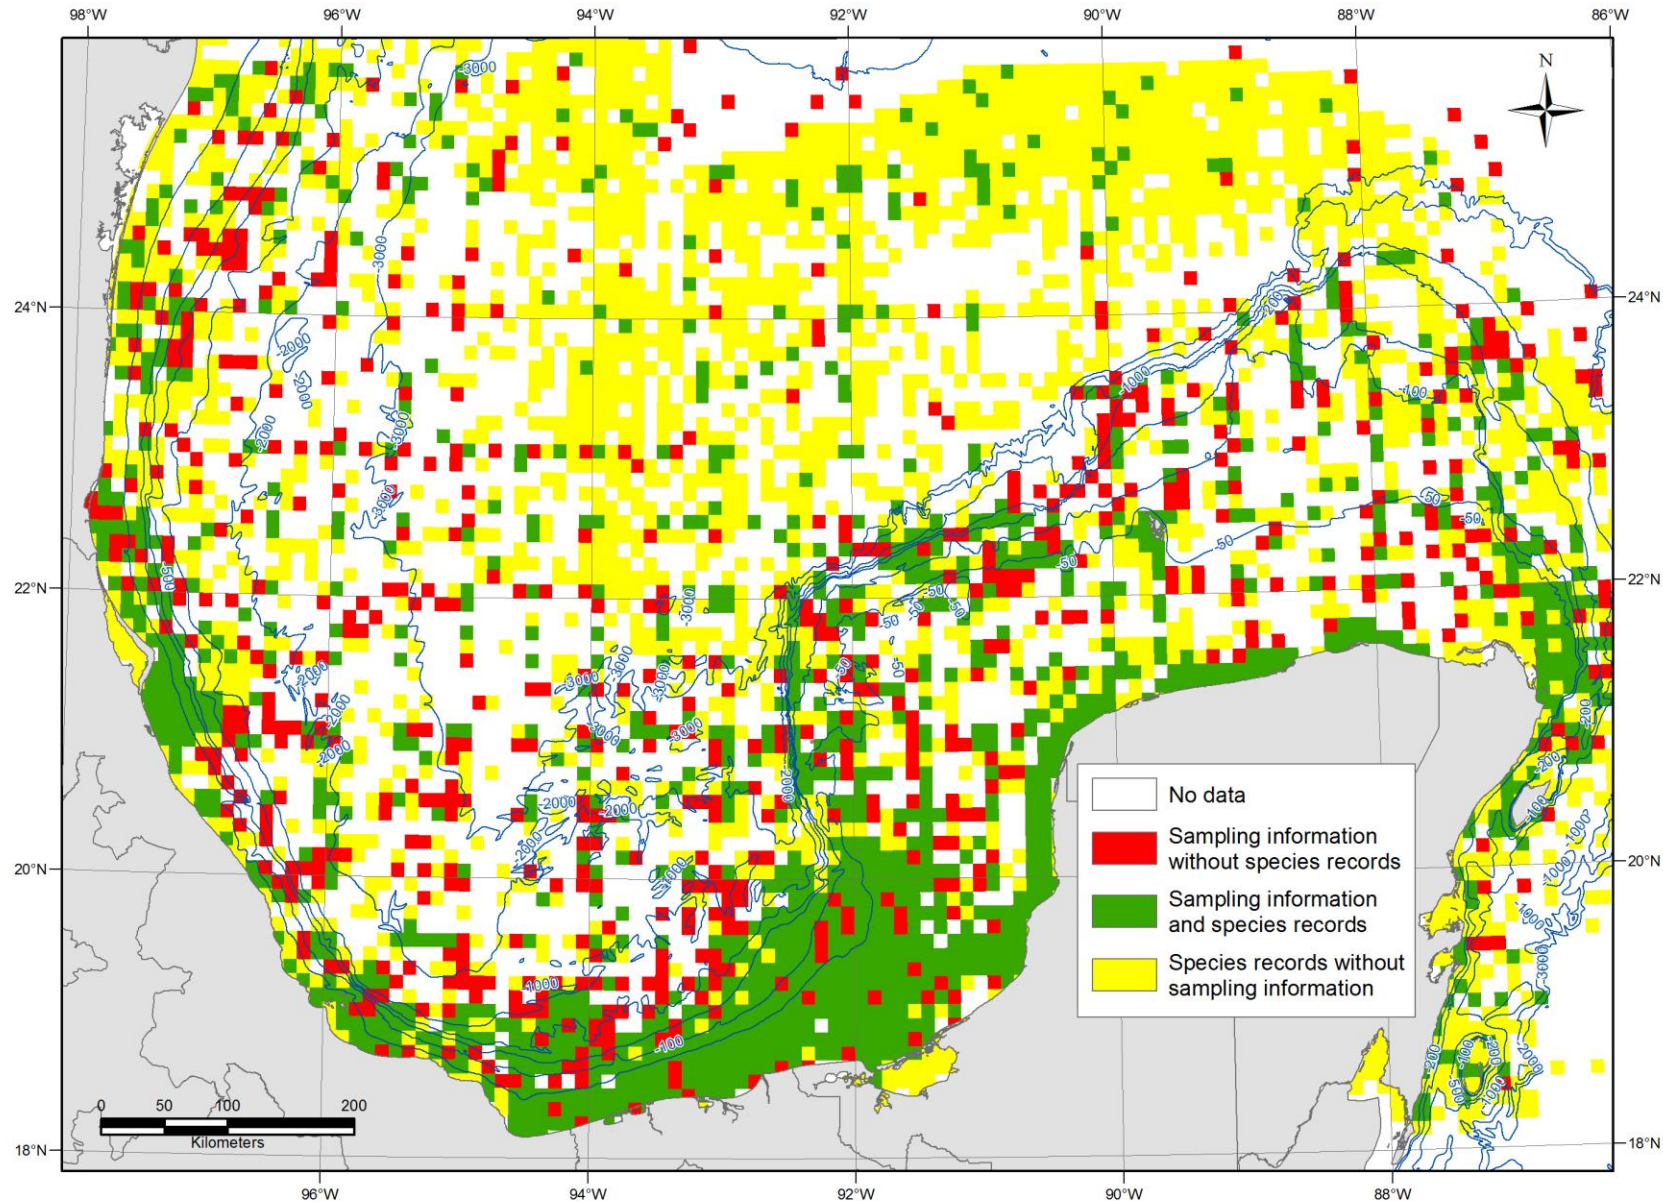

# Sampling locations without species information

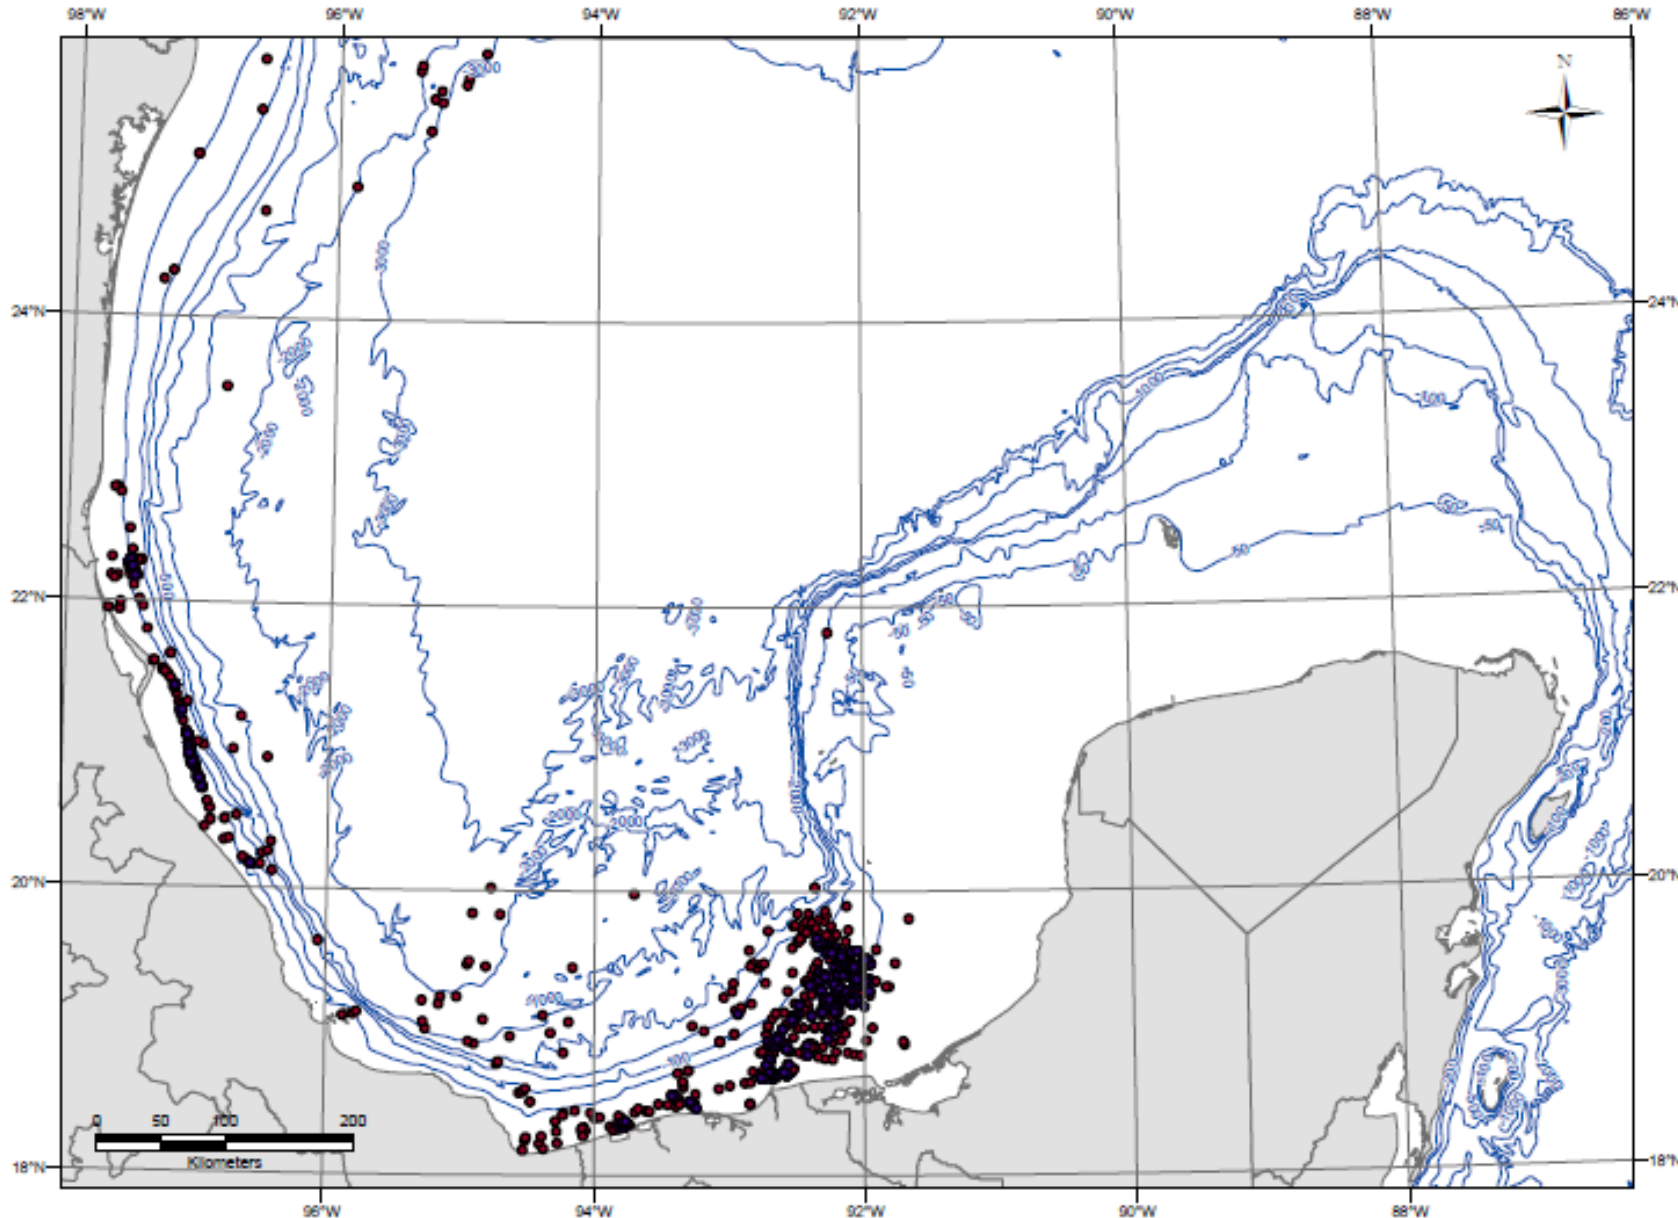

# Species records without related sampling information

# Benthic sampling and species records differences

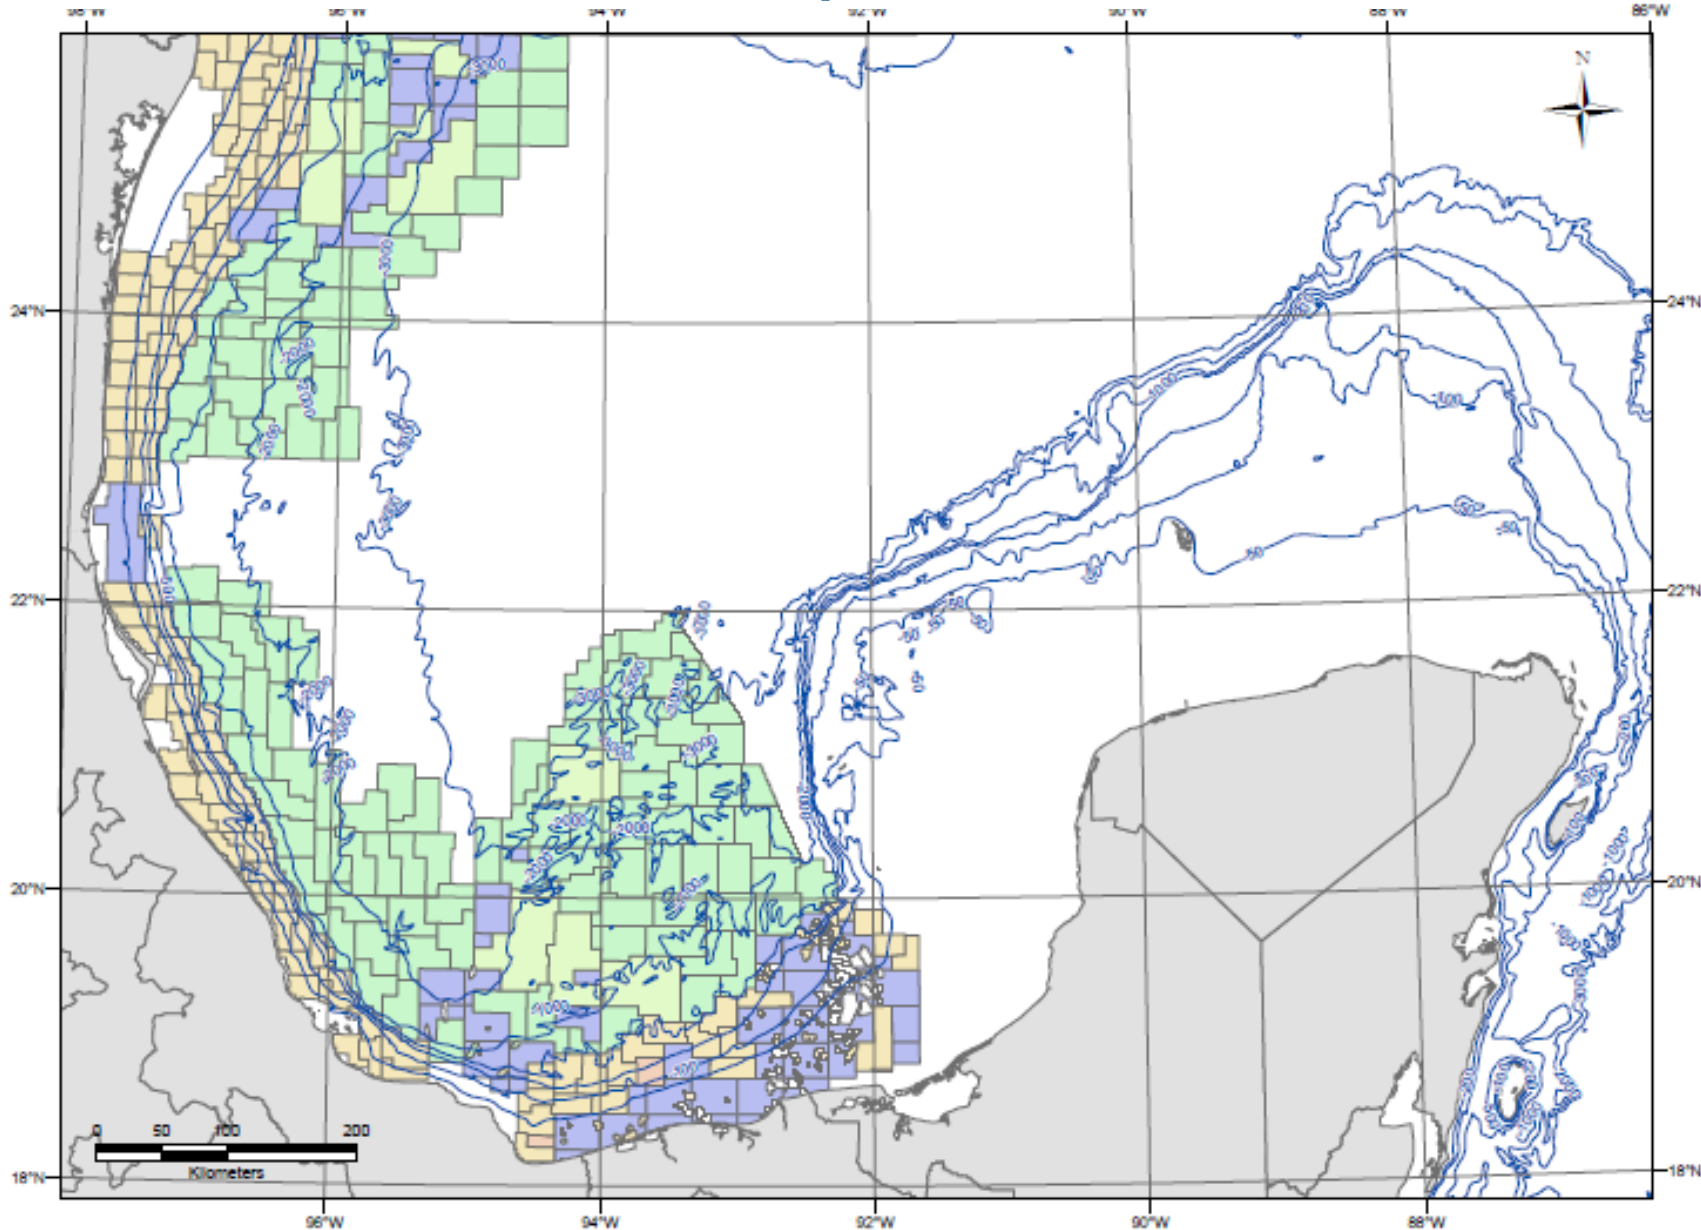

# Current Oil Fields

# 2015 Authorized Seismic Surveys

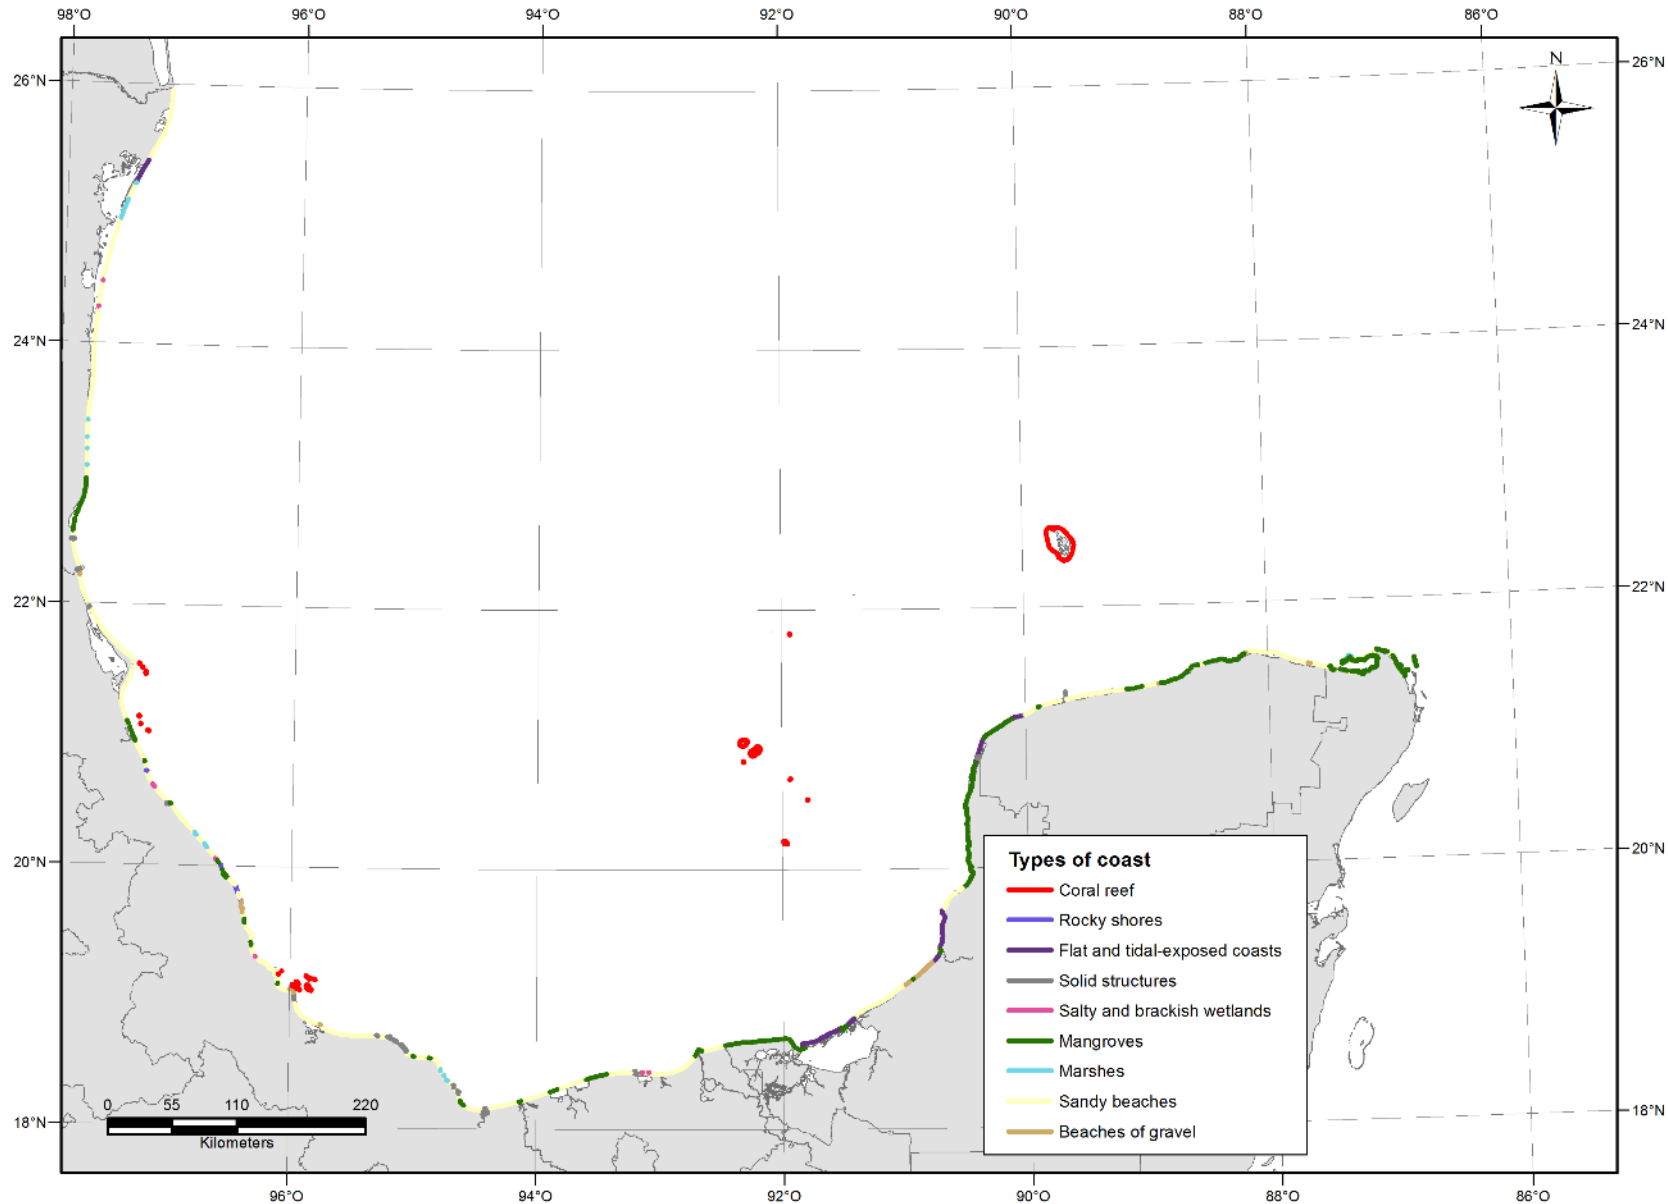

<http://portal.cnih.cnh.gob.mx/>

# Probability of hurricane 4 and 5 (historic)

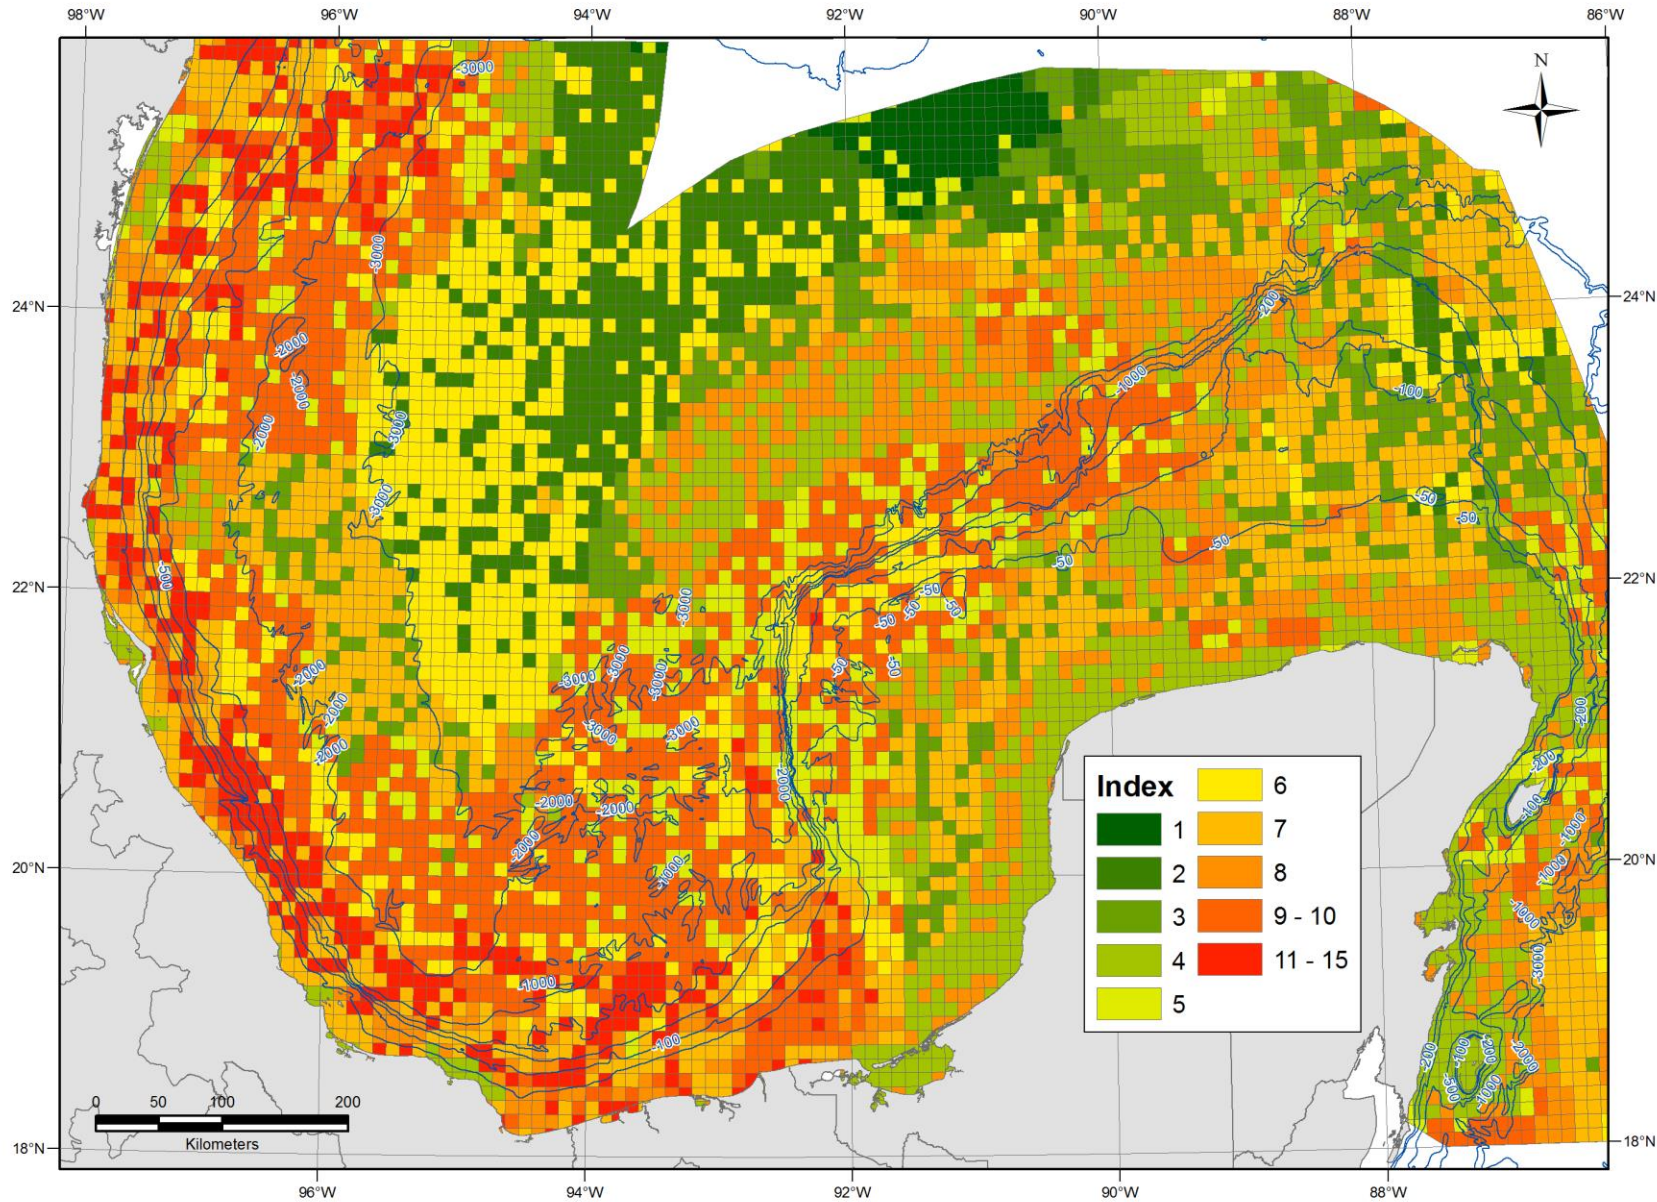

# Types of coast

‘Atlas de vulnerabilidad ambiental del Golfo de México’, publicado en 2006 por la Unidad de Seguridad Industrial, Protección Ambiental y Calidad de La Subdirección de la Coordinación de Servicios Marinos de Pemex Exploración y Producción, Universidad Autónoma Metropolitana.

# Preliminary oil “risk” index

# Issues to deal with, in order to achieve the basis for biological modelling of the GMx biodiversity

- ▶ Point vs area-based-information
- ▶ Presence vs abundance-information
- ▶ Benthic vs nekton vs above water information
- ▶ Historic, current and time-series information
- ▶ Ecological role and/or trophic level
- ▶ Species distribution probability models
- ▶ Species interactions in space and time
